

## **Liquid gas installations on sport boats**

In Germany, the installation, operation and inspection of liquid gas installations on sport boats are regulated by the guideline G 608 of the German Association of Gas and Water Industries “DVGW” (Deutscher Verein des Gas- und Wasserfaches e.V.).

The technical rules of DVGW guideline G 608 apply to boats and yachts, which are not subject to the provisions of the mutual insurance associations.

In the company Werner Brusberg S.L.U. our expert Andreas Lehmann carries out inspections of liquid gas systems on sport boats according to G 608.

The inspection of the liquid gas system according to G 608 must be repeated every 2 years.

For charter yachts under German flag a valid test certificate “Prüfbescheinigung für Flüssiggasanlagen von Wassersportfahrzeugen” is required.
